

NBIS is a unique community of passionate, pragmatic, innovative professionals exploring new ways of doing business that foster thriving companies, communities and ecosystems. NBIS, the Network for Business Innovation and Sustainability, was founded over five years ago with the help of an interdisciplinary group of individuals that shared a vision for an organization that bridges the private and public sectors to meet the unprecedented challenges and opportunities we face today.

About NBIS

NBIS members and leadership board are dedicated to helping companies make the transition from old take make waste models to new paradigms of resource efficiency and social and environmental responsibility. The path forward requires leadership, collaboration and innovative thinking.

NBIS offers opportunities for people to meet and learn from each other, to collaborate across sectors and industries, to gain training in new practices and approaches, and to benefit from world class expertise that NBIS provides through consultation and coaching. NBIS programs inspire companies to reach beyond the limits of traditional models and to engage in turning the engines of industry toward problem solving and prosperity making for a new local and global economy.

NBIS offers a diverse range of programs focused on:

- *Supporting leadership and best practices within businesses;*
- *Networking professionals across industries and providing resources and valuable connections;*
- *Linking businesses with expertise and technical resources to support their endeavors;*
- *Providing opportunities for businesses to leverage change in their industry and to contribute to regional challenges.*

Our Values:

- Cultivate best practices and innovation to position business members and clients to achieve success in the changing global marketplace and within the context of engagement with local economies and ecosystems.
- Collaborate with internal staff and teams to maximize capacity and leadership for successful change management that will enhance profitability for the company and its stakeholders, generate social benefits and reduce environmental impacts.
- Convene talented people and provide supportive environments for peer learning and professional development.
- Link the resources of higher education with business through interdisciplinary action learning and research opportunities.
- Coordinate multidisciplinary educational and consultative resources to support leaders in industry and organizations.
